Calvatis GmbH

Bakery

Your partner for...
...innovative hygiene management

Calvatis is one of the leading independent manufacturers of cleaning and disinfection products. We offer our customers individual hygiene concepts based on this experience. Calvatis has been successfully represented in the global market for over 75 years with its calgonit product range.

The main applications are in

Hygiene consulting and hygiene management
Beverage industry
Food industry
Institutions
Milk-processing industry
Agriculture
Equipment and systems technology
Water treatment
Production to order

calvatis

industrial

Calvatis has a mature product range of over 1,000 branded products in the calgonit product lines and can therefore provide integrated hygiene concepts for all areas.

Calvatis develops and produces at its Ladenburg site in Germany, from where it also coordinates global sales of products and services.

Calvatis products and the company's comprehensive services provide all customers with top quality at an optimal price/performance ratio.

Calvatis is certified according to ► DIN EN ISO 9001 and ► DIN EN ISO 14001

Calvatis specialises in the production of cleaning and disinfection products, particularly when it comes to services, to ensure clear differentiation from competitors.

High quality and environmental awareness are second nature for Calvatis, are lived, maintained and continuously adapted to the increasing demands in the market.

Floor cleaner

Alkaline

tru-lit GR 50

10 L

tru-lit GR 50 is a dirt solvent with a pH-value as an all purpose detergent. The product is suitable for basic and maintenance cleaning for stoneware with porouse surfaces. It is ideal for stone floors made of marble, travertine, granite, slate, concrete and other alkali resistant natural or reconstituted stones. tru-lit GR 50 also removes soiling from sensitive resilient flooring like linoleum or rubber. tru-lit GR 50 cuts through crusted soil and grease as well as polymer films. It is an optimal combination of agents which solves heavy soiling. Due to its foam free formulation tru-lit GR 50 is especially suitable for auto-scrubber. Anti slipping properties are not affected.

tru-lit GR 70

tru-lit GR 70 is a dirt solvent with a pH-value as an all purpose detergent. The product is suitable for basic and maintenance cleaning for stoneware with porouse surfaces. It is ideal for stone floors made of marble, travertine, granite, slate, concrete and other alkali resistant natural or reconstituted stones. tru-lit GR 70 also removes soiling from sensitive resilient flooring like linoleum or rubber. tru-lit GR 70 cuts through crusted soil and grease as well as polymer films. It is an optimal combination of agents which solves heavy soiling. Due to its foam free formulation tru-lit GR 70 is especially suitable for auto-scrubber. Anti slipping properties are not affected.

10,2 kg

tru-lit SAM

10,2 kg

tru-lit SAM is a powerful, ammonia containing general purpose cleaner designed for removal of heavy soil on walls, ceilings and floors in kitchens as well as in sanitary areas. Tru-lit SAM removes sealing and wax deposits on floors and provides surfaces optimally prepared for followup treatment with care as well as sealing agents.

calgonit HDN

calgonit HDN is a mildly alkaline, foaming, liquid product effectively removing heavy fat, oil and resinified soilings. It is compatible with most materials normally used and primarily designed for cleaning motor vehicles, engines, engine parts and awnings. calgonit HDN is also used for cleaning of surfaces in the food and beverage industry.

Acid

tru-lit C-14 WC Gel

tru-lit C-14 WC Gel is a concentrated, phosphoric acid based product which removes persistent rust, lime and urine scale as well as dirt and excrements. It is used to clean toilet and urinal bowls, leaving a pleasant smell. Highly diluted, it is suitable for cleaning of acid-resistant surfaces. Due to its viscous consistency, tru-lit C-14 WC Gel adheres to the surface for a long time, thus allowing a long exposure time.

12 x 750 ml

tru-lit C-15 Sano

8 x 750 ml

10,1 kg

tru-lit C-15 Sano is an acidic cleaner designed for the application on all sorts of surfaces which usually appear in sanitary areas. tru-lit C-15 Sano is appropriate for purification of walls, floors, mountings as well as any sanitary objects. tru-lit C-15 Sano removes effectively soil and scale deposits leaving a convenient and fresh odour.

tru-lit R-10 Bath

tru-lit R-10 Bath is an acidic cleaner designed for use on all types of surfaces normally found in sanitary areas. tru-lit R-10 Bath is suitable for cleaning of walls, floors, fittings and all sanitary objects. tru-lit R-10 Bath effectively removes soil and limescale deposits leaving a pleasant and fresh smell.

8 x 750 ml

Surface cleaning

Acid

tru-lit C-3 Citro

8 x 750 ml

12 kg

tru-lit C-3 Citro is an acidic all purpose cleaner for application in commercial kitchens and other areas. It is an optimal blend of inorganic acids, surfactants and solvents, which makes it effective for removal of inorganic and organic deposits. tru-lit C-3 Citro is especially suitable for removal of scale deposits on kitchen equipment, dish washers, chafing dishes and coffee makers. tru-lit C-3 Citro gives all washable surfaces a shiny, streak- and spot free appearance.

Surface cleaning

Neutral

tru-lit NU 002

10,1 kg

tru-lit NU 002 is a phosphate-free, highly concentrated multi-purpose cleaner for the food processing industry. tru-lit NU 002 has strong fat solving properties and is suitable for manual cleaning of floors, tiles, walls and equipment made of metal, wood or plastic. Removes thoroughly fat and soil. tru-lit NU 002 is also suitable for manual cleaning of dishes, cutlery and glass.

tru-lit C-2 Fresh

tru-lit C-2 Fresh is a neutral all purpose cleaner for manual application in commercial kitchens and for general cleaning in other areas. tru-lit C-2 Fresh is especially suitable for cleaning of all kinds of water resistant surfaces and floorings. The product contains a very efficient combination of active ingredients leaving streak-free and sparkling surfaces. tru-lit C-2 Fresh ensures hygienic tidiness and leaves a pleasant fresh scent.

8 x 750 ml

10,1 kg

tru-li C-1 Mano

12 x 1 L

10,3 kg

tru-lit C-1 Mano is a neutral liquid dishwashing liquid suitable for manual cleaning of dishes, cutlery and glass. The cleaned items dry well without spots or stripes. trulit C-1 Mano is also suitable for general cleaning of floors, walls, tables, machinery and equipment. tru-lit C-1 Mano neither contains solvents nor alkalis and can be used for cleaning of wood, plastic-coated and lacquered surfaces.

calgonit NU 009

calgonit NU 009 is a liquid, high foaming detergent concentrate. It is an ideal general purpose cleaner for all laquered and polished surfaces, glass and plastics and is especially suitable for use on transport vehicles, packaging machines and other equipment in the food industry. calgonit NU 009 has excellent solving capability for many types of soil, specifically for fats and oils and is easily rinsed off.

20 kg

calgonit NU 025

21 kg

calgonit NU 025 is suitable for cleaning of cold stores and can be used up to -25°C.

Surface cleaning

Alkaline

tru-lit C-4 Intense

tru-lit C-4 Intense is an alkaline liquid detergent concentrate for application in commercial kitchens and other areas. tru-lit C-4 Intense is a special grease solving multi purpose cleaner for manual application. It is suitable for all kinds of surfaces and shows good nicotine solving efficacy.

8 x 750 ml

11 kg

tru-lit C-5 Power

8 x 750 ml

11 kg

tru-lit C-5 Power is an effective liquid detergent concentrate with a pleasant smell for application in commercial kitchens and other areas. Due to its special combination the product is especially suitable for removal of fatty and albuminous soil. tru-lit C-5 Power is a very efficient cleaner for all washable surfaces like floors, tiles, tables and other devices.

tru-lit R-25 Glas

tru-lit R-25 Glas is a versatile detergent suitable for cleaning of all smooth and sensitive surfaces like glass, mirrors, marble and tiles. tru-lit R-25 Glas cleans quickly, thoroughly and efficiently. The product removes even tenacious soils like fat and nicotine. tru-lit R-25 Glas is economic in use and leaves streak-free and sparkling surfaces.

8 x 750 ml

5 L

tru-lit R-45 Grease

8 x 750 ml

tru-lit R-45 Grease is an ready to use power cleaner for application in commercial kitchens and other areas. tru-lit R-45 Grease dissolves burnt-in encrustations, grease deposits and all stubborn dirt. tru-lit R-45 Grease is a very efficient cleaner for all washable surfaces like tiles, tables and other devices.

Chlorine

tru-lit R-30 Chlorine

tru-lit R-30 Chlorine is a powerful, chlorine-containing cleaner for use in commercial kitchens and all other food processing areas. tru-lit R-30 Chlorine effortlessly dissolves greasy and burnt-in residues and removes mould stains as well as all bleachable discolorations. tru-lit R-30 Chlorine leaves the treated surfaces in a perfect hygienic condition.

8 x 750 ml

Cleaners for production

Foam cleaner

Acid

calgonit SF 504

calgonit SF 504 is an ideal multi purpose, strong acidic foam cleaner for the food and beverage industry. An optimized combination of powerful surfactants with mineral acids and emulsifying agents makes the product very effective for the removal of tenacious deposits of protein, grease and hard water scale. calgonit SF 504 is easy to remove from surfaces and leaves a shiny surface after rinsing.

24 kg

240 kg

calgonit SF 506

24 kg

220 kg

calgonit SF 506 is an ideal multi purpose, acidic cleaner based on phosphoric acid for use in the food and beverage industry. calgonit SF 506 can be used for manual, foam or soak applications. An optimized combination of powerful surfactants with acids makes the product very effective for removal of tenacious soils like rust. The special inhibitors in calgonit SF 506 essentially reduce attack when used on aluminium and galvanized steel. calgonit SF 506 is suitable for cleaning of cookers and bacon moulds as well as for general cleaning. Tenacious deposits of protein and blood, rust and other soils are removed effectively.

calgonit SF 522

calgonit SF 522 is an acid, phosphate-free foam cleaner designed for use in the food and beverage industry. Due to a special surfactant composition, the product produces a very stable, long cling foam and removes even tenacious soils like lime scale, rust and protein as well as residual alkalinity. calgonit SF 522 produces hygienic clean and sparkling surfaces.

24 kg

calgonit SF 5501

22 kg

calgonit SF 5501 is a phosphorus free, low corrosive, acidic cleaner used for removal of lime scale residues of alkalinity and light organic soiling. calgonit SF 5501 produces a stable foam and is suitable for cleaning of machinery, work surfaces, containers, tiled floors and walls encountered in the food-, milk- and beverage industry. calgonit SF 5501 is normally applied as foam, but can also be used manually.

calgonit SF 529

calgonit SF 529 is a multi-purpose foaming acidic detergent for the food and beverage industry. Its specifically designed composition with nitric acid, hydrogen peroxide and powerful surfactants enables an efficient removal of tenacious soils such as protein and grease. calgonit SF 529 is an excellent descaler. calgonit SF 529 is easily rinsed and leaves a shiny surface in a hygienic condition after rinsing.

22 kg

Foam cleaner

Alkaline

calgonit AF 108

22 kg

calgonit AF 108 is a mildly alkaline general purpose cleaner designed for use in the food industry. The product is suitable for manual, foamor soak applications and effectively removes fat, oil and protein deposits. calgonit AF 108 contains organic chelates to bind water hardness and is non corrosive against most materials. Due to its special composition the product is easily ri sed off and does not formwhite deposits often found with silicated detergents.

calgonit NF 422

calgonit NF 422 is a highly active alkaline foam cleaner for difficult cleaning tasks in the food/beverag industry and livestock farming. The product forms a stable, long clinging foam and is suitable for cleaning of machinery, conveyors, filling plants, walls and floors. calgonit NF 422 is particularly useful where fat, oil and protein soiling is encountered and can also be used on heated surfaces.

24 kg

235 kg

Chlorine

calgonit CF 315

24 kg

230 kg

calgonit CF 315 is a liquid alkaline foam detergent with active chlorine designed for use in the food and beverage industry. The product is suitable for all degrees of water hardness and contains a special inhibitor allowing the use on aluminium and galvanized steel. calgonit CF 315 removes effectively fat and protein as well as any other persistent, organic deposits. It leaves the cleaned surfaces in excellent hygienic condition. calgonit CF 315 is normally applied for foam cleaning of machinery, tanks, tiled walls and floors. The product gives a stable foam and is easily rinsed off. For basic cleaning of heavily soiled parts or containers calgonit CF 315 could be used for immersion cleaning.

calgonit CF 210

calgonit CF 210 is an optimized chlorinated foam cleaner free of silicate for use in the food industry. The product is has excellent soil penetrating properties and is suitable to remove fat and proteinous deposits. calgonit CF 210 is low corrosive on sensitive materials due to its special composition.

Rack trolley and baking tray cleaning

Alkaline

calgonit AN 192

calgonit AN 192 is suitable for cleaning of baking trays and baking moulds made of aluminum in a soaking bath at elevated temperatures. Burned stubborn soil is perfectly penetrated and will be partly removed. Rest of the soil is weakened and becomes easy to remove with a strong water jet. calgonit AN 192 is used undiluted in a heatable bath. Soak the aluminum trays and moulds for several hours at 60-70°C. Depending on soiling leave them between 1 and 6 hours in the bath then use a high pressure cleaning device to remove sticking soil. For very thick soil layers repeat this procedure. The soaking bath can be used for several cleaning cycles until it is consumed.

20 kg

calgonit RT spezial

30 kg
290 kg
840 kg

calgonit RT spezial is a highly concentrated caustic detergent with defoamer for use in the food processing and beverage industry. The product is especially suitable for hot circulation and spray cleaning of tanks, pasteurisers, pipe work, containers, brew kettles, whirlpools and centrifuges. calgonit RT spezial does not foam when applied above 40°C and is easily dosed by conductivity.

Rack trolley and baking tray cleaning

Alkaline

calgonit NF 426

28 kg

calgonit NF 426 is an optimised, liquid foam detergent with high caustic content designed for use in the food industry. The combination of high alkalinity with special solubilizers and detergents gives a stable foam with high adhesive strength. The product has excellent fat-dissolving properties and shows an extremely fast effect due to high penetration capability. calgonit NF 426 is suitable to remove starch, protein, edible oils as well as stubborn soilings like smoke resins, burned grease and other resin residues. calgonit NF 426 is especially suitable for cleaning of smoke houses and baking lines.

calgonit NF 5401

calgonit NF 5401 is liquid foam detergent with high caustic content specifically designed to remove stubborn soils like tar, burned starch and greases in the food industry. The product develops an excellent foam and is mainly used for smoke house cleaning.

1000 kg

calgonit NN 5454

30 kg
300 kg
900 kg

calgonit NN 5454 is a highly concentrated caustic detergent with defoamer. The product is especially suitable for hot cleaning of heavily soiled fryers, cooking and roasting equipment. Encrusted and carbonized grease, carbohydrates and proteins are removed without residues. calgonit NN 5454 is easily dosed by conductivity and is also suitable for circulation and spray cleaning of tanks, containers, pipe work and heaters.

Milk foam cleaner

Disinfection

tru-lit MAR*

tru-lit MAR is a highly effective disinfecting detergent based on microbicidal surfactants and washingactive substances. The microbicidal spectrum of activity includes Gram-positive and Gram-negative bacteria, yeasts and fungi. The microbicidal activity is hardly affected by protein and water hardness. tru-lit MAR is odorless, dissolves grease and protein, has a good soil-carrying capacity and is low corrosive. tru-lit MAR is especially suitable for cleaning and disinfecting of machines and machine parts as well as for use in automated cleaning processes in the institutional areas.

Disinfection

calgonit Hygiene DES Spray*

8 x 750 ml
11 kg

calgonit Hygiene DES Spray is an alkaline, surface-active surface disinfectant based on a microbiocidal alkylamine. The product has a broad spectrum of activity against gram-positive and gram-negative bacteria, yeasts, fungi and enveloped viruses. It is scarcely affected in its activity by protein, is good fat solving, nearly odourless and non corrosive. calgonit Hygiene DES Spray is a ready-to-use solution for universal use and is especially suitable for spray and wipe disinfection of work surfaces, equipment, machines, fillers, floors and walls in the food and beverage industry, catering and all areas of maintenance cleaning that require disinfection.

Alkaline

calgonit DS 666*

calgonit DS 666 is a highly alkaline foam detergent for use in the food and beverage industry and is suitable for the surface cleaning of machines, apparatuses, containers, tiled walls and floors. The combination of high pH and efficient biocidal active substances reduces a broad spectrumof harmful bacteria. The product forms a very stable foam for enhanced contact time also on vertical surfaces. calgonit DS 666 removes especially organic contamination like fat and protein. calgonit DS 666 can be used for nearly all water conditions and is easy to rinse. The product is suitable for copper, brass and bronze.

✓ Tank volume	1.000 ml (Euro bottle)
✓ Housing	Plastics
✓ Operating lever	briefly
✓ Inscription	Hand soap

Stainless steel dispenser

Technical data:

✓ Tank volume	1.000 ml (Euro bottle)
✓ Housing	Stainless steel
✓ Operating lever	long

Universal dispenser Typ T3.1

Technical data:

✓ Tank volume	500 ml
✓ Housing	Plastics / VA
✓ Operating lever	short

KH SDS-A Automatic dispenser

Technical data:

✓ Tank volume	900 ml
✓ Housing	Stainless steel
✓ Operating lever	Sensor controlled

Homewater pressure Foam unit SG 2

Piece

The foam cleaning unit SG 2 is connected directly to the existing water supply via a hose with quick coupling. The concentration is adjusted via plug-in nozzles covering a range of approx. 1 to 8 %. Up to 3 liters of foam cleaning concentrate are filled into the unscrewable concentrate container.

Foamer

Easy handling, as the normal house water pressure of 2.5 to 6 bar is already sufficient. With a flow rate of 6 l/min a quick cleaning is possible.

- ✓ Easy connection to the water hose
- ✓ Concentration adjustment by turning the dosing head

Piece

Foam-Matic 1.25

Acidic foam (red push button)
Alkaline foam (blue push button)

The foam cleaning device Foam-Matic 1.25 produces a dry foam which has a long adhesion and action time. This very good foam quality saves mechanical cleaning effort and thus time, energy and chemicals. Thanks to the pressure storage volume and the hand pump, foaming can be done quickly and mobile, independent of a compressed air connection.

Mobile foam unit BE 20

Mobile foam unit with 20 liter container for foaming foam cleaning products.

- ✓ Air inlet pressure: max. 6 bar
- ✓ Air hose: 15 m
- ✓ foam lance 800 mm
- ✓ Empty weight: 5 kg

Piece

Spray unit yellow 7 Liter

Piece

The Industry Line sprayers are special devices designed for exceptionally difficult applications. They are resistant to a wide range of chemicals used in industry. The acid-resistant lance, the Viton seals and the ultra-durable pressure vessel guarantee both that the device can handle and survive even the most difficult tasks and that the user is completely safe.

Spray unit yellow 1,5 Liter

The Master Line sprayers are modern hand pressure sprayers. Thanks to their user-friendly design and the excellent quality of the seals, they are considered one of the best technical solutions for sprayers currently available on the market are available.

- ✓ for personal hygiene
- ✓ in dealing with illnesses

...regularly monitors adherence to specifications by determining the concentrations used and the success achieved

...documents these monitoring results

- ✓ service report per visit

Colour concept

We have developed a colour concept to improve safety while working with Calvatis products. This makes it possible to determine the type of product from the colour of the canister and the labels. It makes handling our products much easier and also promotes increased safety during processing.

Alkaline

Chlorine

Acid

Disinfection

Neutral

Use of the products requires adherence to the precautions applicable to handling chemicals! Notes on risks and safety can be found in the relevant safety data sheets!

Before a cleaning and disinfection agent is used, its compatibility with the material concerned must be examined!
